

# CCDF Eligibility in Wisconsin, Statewide and in Substate Areas in 2018

Kelly Dwyer  
ACS Data Users Conference  
May 20, 2021

# Today's Presentation

- Project Overview
- Estimating Eligibility and Participation Using ATTIS
- Mapping Households
- Statewide and Substate Eligibility Estimates
- Appendix Slides

# Project Overview

# Choosing the ACS

- Wisconsin Department of Children and Families wanted eligibility estimates for subsidized child care
- Large sample size
  - Reliable state level estimates
  - Substate estimates using multi-year data file

# Child Care and Development Fund (CCDF)

- Block grant that funds child care subsidies for families with lower incomes
- Federal legislation and regulations set broad guidelines
- States, Territories, and Tribes set specific policies
- In the average month in 2018:
  - 1,321,100 children were served
  - 813,200 families were served

Source: <https://www.acf.hhs.gov/occ/data/fy-2018-preliminary-data-table-1-average-monthly-adjusted-number-families-and-children>

# Wisconsin Shares Child Care Subsidy Program

- Children under age 13 are eligible, or age 18 if they have special needs
- Parents can work, attend certain education or training programs, or search for a job
- Income Eligibility Limits for 2018:

Family Size	Initial Eligibility Limit	Continuing Eligibility limit
2	\$2,538	\$4,107
3	\$3,204	\$5,073
4	\$3,700	\$6,039
5	\$4,536	\$7,005
6	\$5,202	\$7,972

# Estimating Eligibility and Participation Using ATTIS

# Analysis of Transfers, Taxes, and Income Security (ATTIS)

- Microsimulation model using ACS data
- Can be used for national, state-level, or substate area analysis
- Estimates eligibility in major means-tested benefit programs
- Applies detailed policy rules at an individual and household level
- Models participation by correcting for underreporting

# Preparing Data

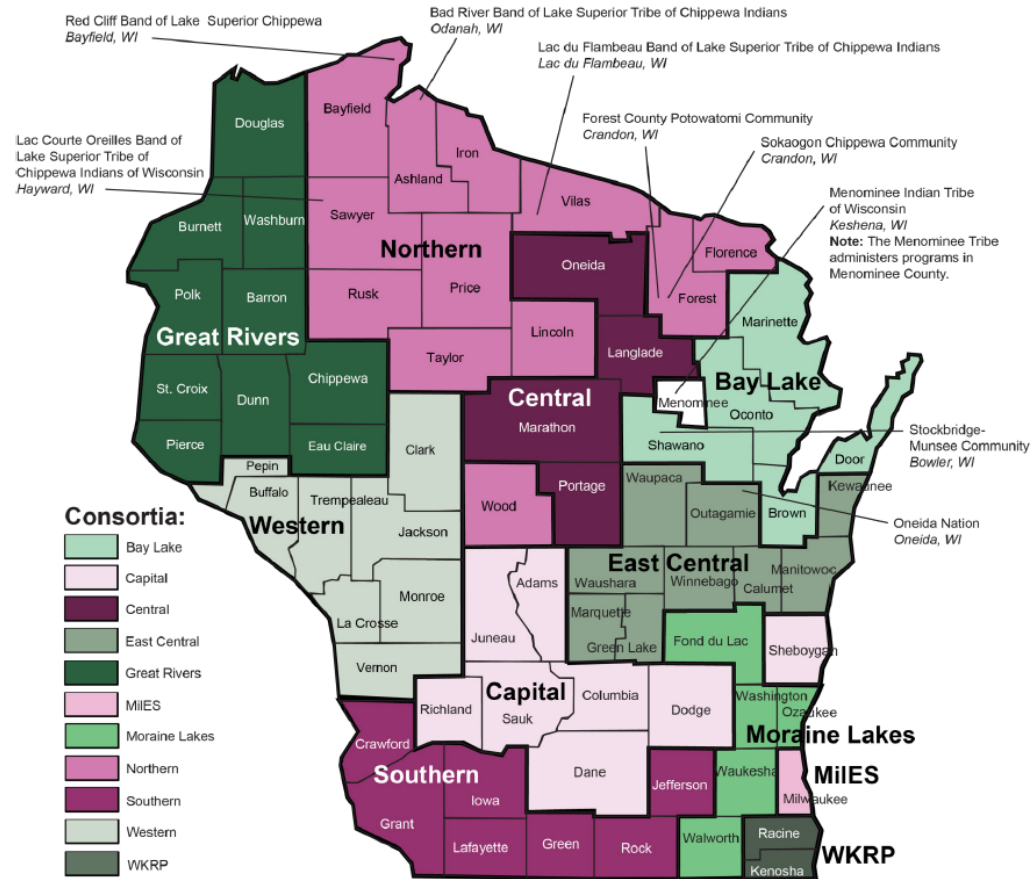

- 5-year data file (2014 – 2018)
- Additional adjustments
  - Legal status of noncitizens
  - Parental status of cohabitating partners
  - Allocating weeks of work
  - Allocating other income

# Refining Estimates

- Modeling other programs
  - Unemployment
  - SSI
  - TANF
- Modeling participation
  - Compare estimates to administrative data
  - Account for families already participating

# Mapping Households

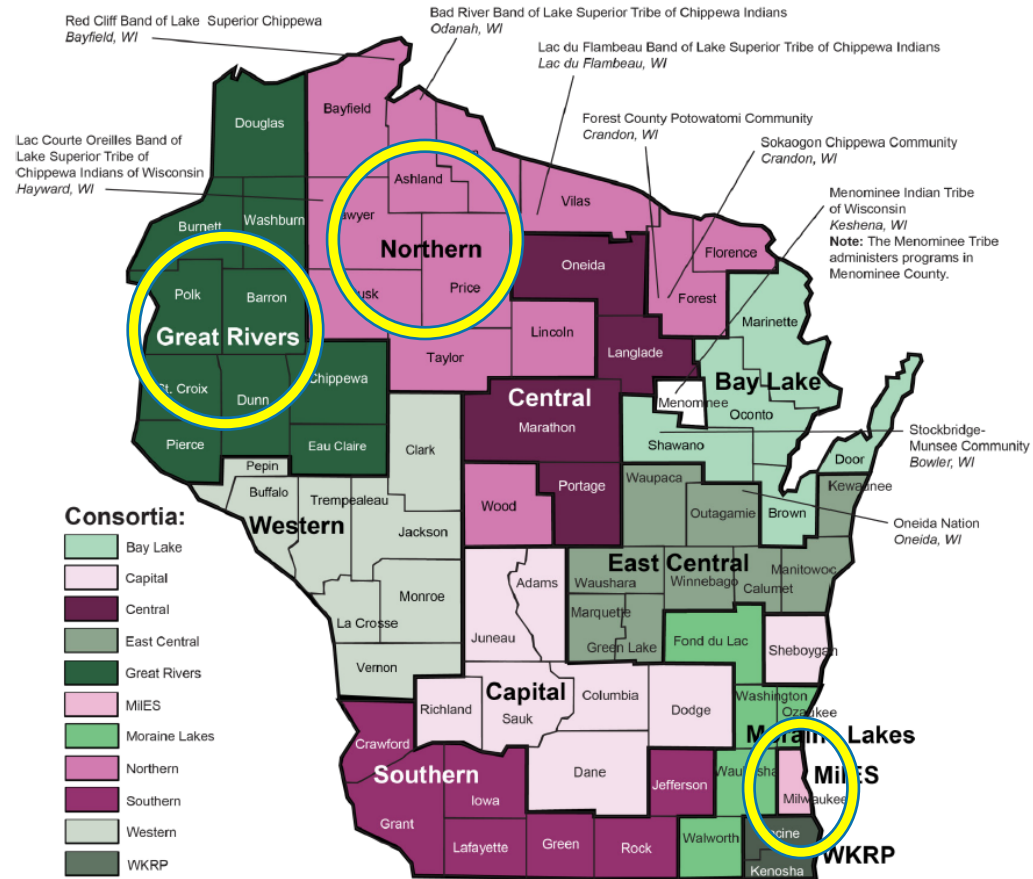

## Map of Income Maintenance Consortia and Tribal Agencies

## Map of Income Maintenance Consortia and Tribal Agencies

# Statewide and Substate Eligibility Estimates

# Eligibility for CCDF Statewide, 2014-2018

Age of Child	Average monthly number	Share of Eligible Children
0 – 2	37,000	21%
3 – 5	39,100	22%
6 – 12	96,000	55%
13 + *	3,400	2%
Total	175,500	100%

\* ATTIS identifies teenagers as having special needs when they receive SSI, underestimating the size of this group

# Eligibility for CCDF Statewide, 2014-2018

Income Level	Average monthly number	Share of Eligible Children
Less than 100% FPG	65,300	37%
100% - 200% FPG	107,500	61%
Greater than 200% FPG	2,600	1%
Total	175,500	100%

# Eligibility for CCDF Statewide, 2014-2018

<b>Number of Parents/Guardians</b>	<b>Average monthly number</b>	<b>Share of Eligible Children</b>
<b>Two</b>	<b>49,000</b>	<b>28%</b>
<b>One</b>	<b>126,500</b>	<b>72%</b>
<b>Total</b>	<b>175,500</b>	<b>100%</b>

# Eligibility for CCDF in Selected Substate Areas, 2014-2018

IM Consortium or Urban Zone	Average monthly number	Share of Eligible Children Statewide
Milwaukee	50,100	29%
WKRP Urban	15,700	9%
Capital Urban	11,800	7%
Southern Rural	900	0.5%

# Eligibility for CCDF in Selected Substate Areas, 2014-2018

IM Consortium or Urban Zone	Average monthly number	Share of Eligible Children Statewide	Eligible Children as Share of Child Population
Milwaukee	50,100	29%	30%
WKRP Urban	15,700	9%	27%
Capital Urban	11,800	7%	15%
Southern Rural	900	0.5%	14%

# Summary

- ATTIS is an ACS based microsimulation model maintained by the Urban Institute
- Estimate eligibility and model participation and level of benefit receipt for major means tested programs
- Using a 5-year data file and mapping PUMAs to counties helped us estimate substate eligibility in Wisconsin
- About 175,000 children and 100,000 families were eligible in the average month

# Acknowledgements

This report this presentation is based on was funded by the Wisconsin Department of Children and Families. The ATTIS microsimulation model is supported by funds from the Robert Wood Johnson Foundation as part of Urban's Safety Net to Solid Ground Initiative.

The views expressed in this presentation do not necessarily reflect the views or policies of the Wisconsin Department of Children and Families, the Urban Institute, or the Urban Institute's trustees or funders.

Thank you to my co-authors on this report: Sarah Minton, Linda Giannarelli, Silke Taylor, and Ilham Dehry.

# Appendix Slides: Standard Errors

- We compute the standard error estimates with the generalized variance function method, using design factors as specified by the Census Bureau for the Public Use Microdata Sample.
- We base our estimates on the fact that the CCDF-eligible children are a subset of all children age 12 or younger in the geographic area and that the CCDF-eligible families are a subset of all households with children age 18 or younger.
- We consider the small number of CCDF-eligible children that are older than age 12 to be negligible for the standard error estimate.

# Appendix Slides: Standard Errors

TABLE 4

Children Eligible for CCDF in Wisconsin Substate Areas in the Average Month (2014–18)

	Average monthly number	Standard error	95% confidence interval lower bound	95% confidence interval upper bound
<b>Total for Wisconsin</b>	175,500	2,134	171,300	179,600
<b>Selected counties<sup>a</sup></b>				
Kenosha	7,400	416	6,600	8,200

Source: Urban Institute ATTIS model; using 2014–18 five-year American Community Survey data from the IPUMS project at the University of Minnesota (Ruggles et al. 2020).

Notes: Estimates for Wisconsin were calculated using the 2018 five-year American Community Survey file to increase the sample size and reliability of substate estimates. Eligibility estimates are rounded to the nearest 100. Estimates for the IM Consortia and Urban Zones may not add to the totals because of rounding.

<sup>a</sup> The two counties shown separately are also included in the IM Consortia and Urban Zones estimates.

<sup>b</sup> Households were mapped to an IM Consortia or Urban Zone based on their PUMA and a mapping plan developed by Urban Institute staff.
